1ST - 3RD MAY

2026

COME MEET SUPPLIERS AND GRAB A DEAL

Fertiliser Supply Update

With the season already underway, we'd like to keep our customers informed about current fertiliser supply and what it may mean for the months ahead.

Recent global disruptions are continuing to impact the availability of some key fertilisers, particularly urea. While this may create some tightening in supply, please be assured that product is still coming into the country and through our supply network.

We are working closely with our suppliers to secure stock and maintain supply wherever possible. Additional efforts are being made to increase availability of alternative nitrogen sources, to help ensure customers can continue their programs with confidence.

While there may be some delays on certain lines, there are still effective options available, and with a bit of forward planning, we can help keep you on track this season.

Current Availability Update:

- Croplift 15 bulka bags are expected to be available from late May
- Superfect is expected to be available from mid to late April

We understand this is a critical time of year, and supply timing is important. Our team is here to help you plan ahead, navigate availability, and find the right solutions for your operation.

We strongly encourage customers to plan ahead where possible and have a conversation with us about your requirements. By working together early, we can ensure the best possible outcomes for the season.

If you have any questions or would like to discuss alternative options, please don't hesitate to get in touch or visit us in store.

Ivomec Pour-On

For the treatment and control of ivermectin-sensitive gastrointestinal roundworms, lungworm, eyeworm, sucking and biting lice, sarcoptic and chorioptic mange mites, buffalo fly and cattle tick in cattle, and for the treatment and control of gastrointestinal roundworms and lungworm of red deer.

Benefits

- Controls worms, lice, cattle tick and buffalo fly on cattle Buffalo fly control – up to 21 days
- Long cattle tick control – up to 28 days Long lice protection – up to 56 days Convenience of a pour-on application

Eprinex Pour-On

For the treatment and control of internal and external parasites of beef and dairy cattle and internal parasites of deer.

Benefits

- The convenience of a broadspectrum pour-on
- Sustained activity to kill more species of worms for longer than any other pour-on
- Nil milk, nil meat withholding periods and nil ESI Completely weatherproof – not just rainfast

Sapphire Nutrition – True Blue Cat Food

When it comes to your family cat, good nutrition is everything. True Blue Nutrition focuses on delivering a no-fuss, complete and balanced diet designed to support cats at every stage of life. True Blue Family Cat – Aussie Chicken & Tuna is made with quality local ingredients and built to keep your cat healthy, happy, and thriving.

Why choose True Blue Family Cat?

- 8% Fat to provide essential energy
- Omega 6 Fatty Acids to maintain healthy skin and a shiny coat
- Calcium to support strong bones and teeth
- Packed with essential vitamins and minerals for overall wellbeing
- Designed to appeal to even the fussiest eaters

Suitable for all life stages, including kittens, it's a reliable, everyday feed you can trust.

Available in-store now.

Avomec Plus – All-in-One Parasite Control for Cattle

Keeping cattle healthy and performing well starts with effective parasite management. Avomec Plus is a convenient pour-on treatment that helps manage both internal and external parasites – including all three stages of liver fluke – in one easy application.

What it does:

Avomec Plus combines two powerful actives – abamectin and triclabendazole – to treat and control a wide range of parasites in cattle. It targets gastrointestinal roundworms, lungworm, sucking and biting lice, and has the added benefit of controlling early immature, immature and adult liver fluke.

Why it's useful:

- Simple pour-on: Quick to apply along the backline and rainfast once dry.
- Broad coverage: Helps protect against worms and external parasites, reducing performance losses associated with parasite burdens.
- Fluke protection: Triclabendazole is effective at all fluke stages – an important part of reducing liver damage and pasture contamination in high-risk areas.

How to use:

Dosage is based on live weight (1 mL per 10 kg), applied as a pour-on along the back from the shoulder blades. It's not recommended for calves under 50 kg.

Withholding periods:

- Meat: Do not use less than 49 days before slaughter for human consumption.
- Milk: Not for use in dairy animals producing, or that will produce, milk for human consumption.
- Export Slaughter Interval: 140 days.

Avomec Plus offers a practical and broad-spectrum tool for strategic parasite control in cattle, helping your stock stay healthier and more productive throughout the year.

Reward Your Vaccination Program with Websters

For a limited time, you can get more value from your animal health program with a rewarding offer on Websters vaccines. Simply purchase eligible Websters vaccine packs, upload your receipt, and choose your reward.

Reward Options:

\$20 Gift Card for every 200 mL pack purchased (maximum 10 per customer)

\$50 Gift Card for every 500 mL pack purchased (maximum 10 per customer)

It's a great opportunity to stay on top of your livestock health while putting something back in your pocket.

Pop in-store to secure your supply and take advantage of this limited-time offer.

Don't miss out!

We currently have Websters 6 in 1 + Selenium 200ml available in store.

WEBSTERS BONUS REWARDS

*Maximum 10 per customer. While stocks last.

WHY CHOOSE CYDECTIN WEANERGUARD SE B12?

CONTAINS MOXIDECTIN

Moxidectin is the most potent member of the macrocyclic lactone (ML) family of drenches, meaning it can kill worms resistant to ivermectin and abamectin.

CONTAINS 6 IN 1 VACCINE

CYDECTIN WEANERGUARD SE B12 is a convenient combination of moxidectin and five clostridial disease and cheesy gland antigens. It is ideal at weaning when a drench and vaccine “booster” are needed at the same time, and particularly for lambs and lighter hoggets between 15 and 37kg.

CONTAINS SELENIUM

Selenium deficiency can suppress the animal's immune system, as well as cause ill thrift, infertility, reduced production and white muscle disease.

CONTAINS VITAMIN B12

Vitamin B12 deficiency occurs where intake of cobalt from pasture and soil is low. It can cause a number of clinical signs including loss of appetite, decreased growth rates, weight loss, watery ocular discharge and anaemia. These signs can occur despite an abundance of available pasture.

BROAD SPECTRUM PARASITE CONTROL

CYDECTIN WEANERGUARD SE B12 is highly effective against all major internal parasites that are susceptible to ML drench, including gastrointestinal roundworms and large lungworm. These worms can reduce overall productivity, especially in young animals. Weight gains and wool growth can be reduced significantly. CYDECTIN WEANERGUARD SE B12 also controls itch mite and nasal bot.

PERSISTENT ACTIVITY

CYDECTIN WEANERGUARD SE B12 prevents reinfection with barber's pole worm for not less than 21 days. Persistent activity is important when there is significant pasture contamination, as it can delay the need for subsequent drenching.

Red River

Our mission at Red River is to manufacture and supply top-quality, affordable stockyards to the stockman big or small. Using intuitive design and first class customer service, we strive to meet the demand for stock handling equipment Australia wide.

Yards designs focused on operator and stock safety, minimise loses and carcase downgrades due to bruising, hide abrasions and the rising pH levels in meat. The best prices come from the best meat.

Features like our Double Hinged Gate, Round Panel post not square, slam gates from two directions and our extremely successful G-force just to mention a few.

A well designed and constructed stockyard is surely one of the most important on farm investments.

Our experienced yard builders have the valuable knowledge and experience required to work safely and offer advise on how to best set up yards.

All yards can be customised on site to meet specific customer needs.
