## Dalgety Drenches

### KEEP YOUR CATTLE PROTECTED WITH DALGETY PROXIMAX<sup>®</sup> POUR-ON

Healthy cattle start with effective parasite control. The Dalgety Proximax<sup>®</sup> Pour-On for Beef & Dairy Cattle is a convenient pour-on drench designed to help treat and control internal and external parasites in cattle. Containing Eprinomectin, Proximax<sup>®</sup> helps control a range of parasites including gastrointestinal worms, lungworm, lice, mites and buffalo fly, making it a great choice for your cattle health program.

- ✓ Easy pour-on application
- ✓ Suitable for beef and dairy cattle
- ✓ Helps manage worms and external parasites
- ✓ Available in 5L and 20L packs

### KEEP YOUR HERD PROTECTED WITH DALGETY MOXIMAX<sup>®</sup> POUR-ON

Effective parasite control plays an important role in maintaining healthy, productive cattle. Dalgety Moximax<sup>®</sup> Pour-On for Cattle & Red Deer is a ready-to-use treatment designed to help control a range of moxidectin-sensitive internal and external parasites. Containing Moxidectin 5g/L, Moximax<sup>®</sup> helps control parasites including gastrointestinal worms, lungworm, cattle tick, lice, mites and buffalo fly. Its easy pour-on application makes treating cattle simple and convenient.

- ✓ Easy pour-on application
- ✓ Helps manage internal & external parasites
- ✓ Suitable for cattle and red deer
- ✓ Available in 2L, 5L & 15L packs

### PROTECT YOUR FLOCK WITH DALGETY TRIOSHIELD<sup>®</sup> 3-WAY COMBINATION DRENCH

Maintaining effective worm control is essential for healthy, productive sheep. Dalgety Trioshield<sup>®</sup> 3-Way Combination Drench is a broad-spectrum sheep drench formulated to help treat and control a range of gastrointestinal parasites. Trioshield<sup>®</sup> combines three active ingredients – abamectin, albendazole and levamisole – helping target worms from different chemical groups. It also provides control of lungworm, itch mite and nasal bot (larval stages), while supplying selenium and cobalt.

- ✓ Triple combination worm control
- ✓ Helps manage resistant worm strains
- ✓ Suitable for sheep
- ✓ Available in 5L & 20L packs

## OPEN DAY EVENT RECAP 🎉

What a fantastic day we had at Town & Country Rural Supplies for our Open Day on Thursday 4th June!

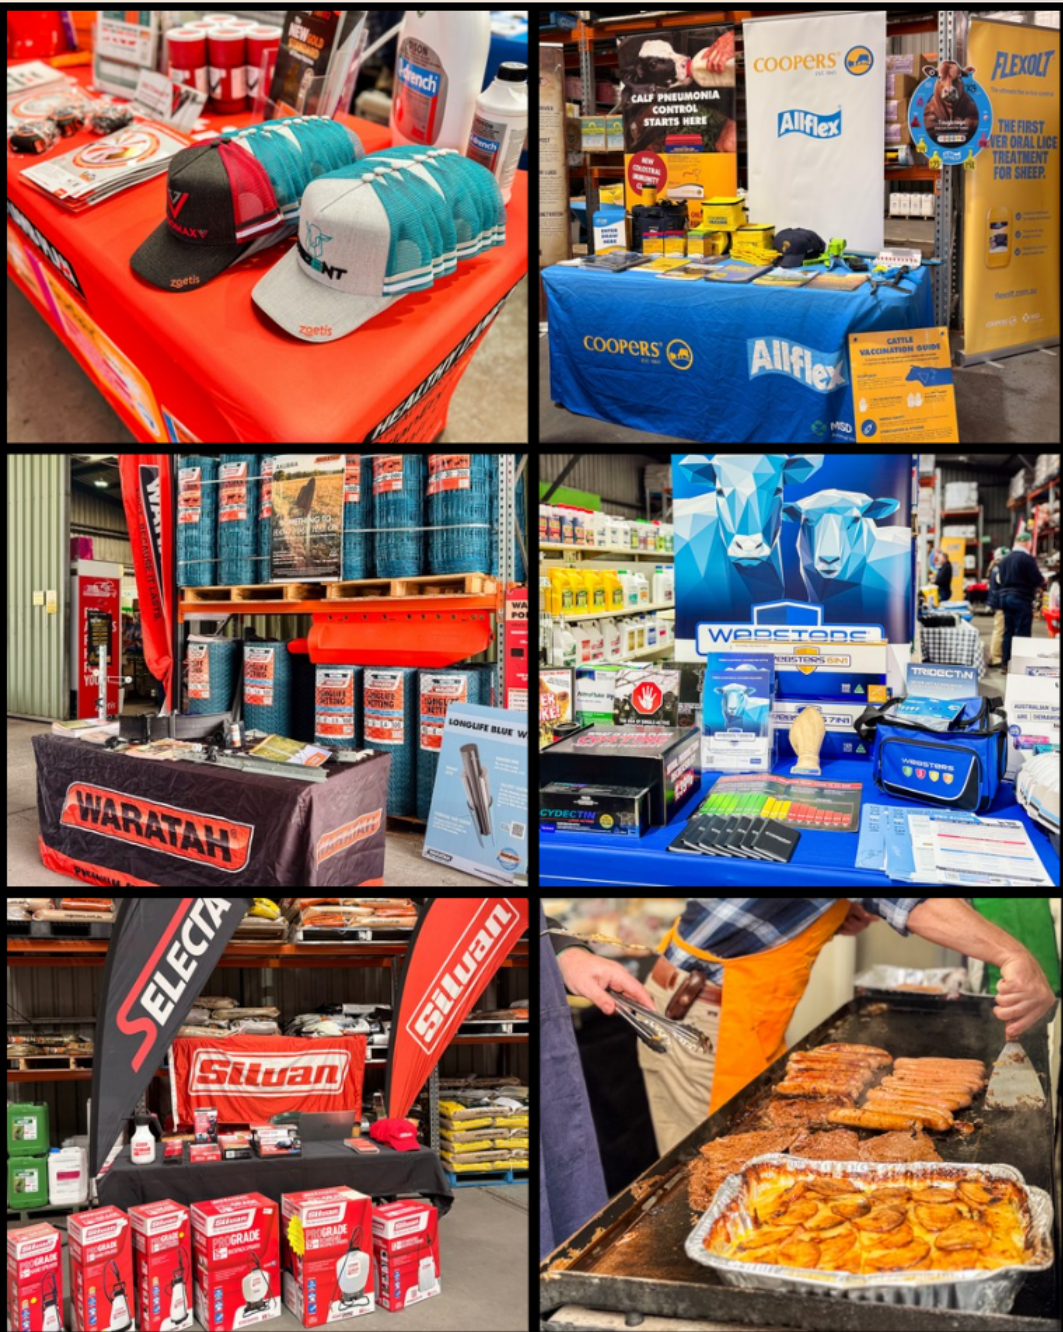

We would like to thank everyone who came along, supported the event, and helped make the day such a great success. It was wonderful to see so many familiar faces, meet new customers, and connect with our suppliers and local community.

The day was filled with product demonstrations, supplier information, exclusive deals, great conversations, and plenty of opportunities to learn more about the products and services we offer.

A big thank you goes to all of our suppliers and sponsors who attended and contributed to the day – your support and commitment to Town & Country Rural Supplies and our local community is greatly appreciated.

We also want to thank everyone who enjoyed the BBQ lunch, stopped in for a coffee, and took the time to visit us. Your ongoing support means so much to our team.

The Open Day was a great reflection of the strong community we are proud to be part of, and we look forward to continuing to support our customers with quality products, trusted advice, and great service.

## ZOETIS LAMB AND CALF VACCINATIONS (4-6 WEEKS OF AGE)

The Zoetis Advantage is unique. Only Ultravac 5in1:

- Uses a ultrafiltration technology. Zoetis’s unique ultra-filtration process creates a more pure vaccine that stimulates a targeted response by the immune system. It ensures rapid and effective protection against the dangerous clostridial diseases.
- Can be used for up to 30 days after opening (provided storage instructions are followed). This provides added convenience as this longevity enables the vaccine to easily fit in with farm management practices.
- Has an ultrafiltered low volume dose. The recommended dose is 2 mL for cattle and 1mL for sheep. This means less fridge space is required and fewer vaccine bottle changes are needed when vaccinating large numbers of stock.
- Ultravac 5in1 is also safe for all stages of pregnancy.

### DOSAGE

A booster dose given 12 months after the two basic doses of vaccine should confer lifelong immunity against blackleg and tetanus. However, further annual boosters are required to maintain immunity against black disease and malignant oedema. More regular doses may be required to maintain immunity against enterotoxaemia (pulpy kidney). These are best given prior to seasonal challenge and advice from your local veterinarian is recommended. Annual booster doses should be given around four weeks before calving or lambing to ensure that passive immunity is passed onto the new-born calf or lamb via the colostrum (first milk).

Cattle Dose - 2mL      Sheep Dose - 1mL

## MARKING RINGS & APPLICATORS

### Marking Rings

These pure latex standard marking rings contain no fillings to ensure positive, germ-free marking and are used for the castration of lambs and calves. When used for the castration of animals, please consult with your local veterinary practice before use. Applied using the Applicator Marking Rings Metal or Applicator Marking Rings Plastic.

Availble in 125pk 500pk & 2000pks

### Jumbo Marking Rings

These pure latex jumbo marking rings are used to castrate bulls from 120kg to 340kg. With a square-shaped edge, the rings open in a triangular shape to 100mm x 75mm x 75mm.

### Marking Ring Applicator (Metal & Plastic)

Designed for one handed operation, the Applicator Marking Ring Metal & Plastic is superbly engineered with non-slip prongs.
