KEN-ZON

KENSO agcare Together we grow

Ken-Zon brush control herbicide is a co-formulation of Picloram and Triclopyr herbicides ideal for the control of tough woody and noxious weeds. The Ken-Zon formulation contains specific emulsifiers to ensure even coverage and product stability.

For control of weeds such as:

- Blackberry - December to April
- St John's Wort - October to January
- Lantana - January to April
- Rubber Vine

BEST USE TIPS

- Ensure plant back periods are adhered to
- Always use mixing partner where recommended
- Always use specific adjuvants where directed for best results
- Be aware of your surrounding areas.
- KEN-ZON is susceptible to physical and volatile spray drift into susceptible crops, plants, pastures, waterways and native vegetation

Controls a wide range of hard-to-kill woody and brush weeds. Suitable for multiple application methods including knapsack, handgun, aerial, boom spraying, CDA and blanket wipers. Formulated with specific emulsifiers to help ensure effective coverage and product stability.

Allflex®

Important Announcement

Please be advised that Allflex orders placed from 20.10.26 will be subject to an approximate six-week delay due to Allflex upgrading their online ordering system.

Allflex will resume processing orders from 9 November, with dispatch not expected to commence until after the end of November due to a significant backlog of orders.

We encourage customers to place orders for their upcoming requirements as early as possible, so they can be in the queue for processing and dispatch once the system is back up and running.

Unfortunately, these delays are outside our control, and we are unable to fast-track individual orders.
We apologise for any inconvenience and thank you for your understanding.

Zolvix™ Plus – Combination Drench for Sheep

Zolvix™ Plus is a combination sheep drench from Elanco containing monepantel and abamectin. It provides broad-spectrum control of important internal worms, including worms resistant to single, double and triple drench groups.

Zolvix Plus contains 25 g/L monepantel and 2 g/L abamectin, combining two different modes of action to provide effective worm control and help manage drench resistance.

Key benefits:

- Controls a broad range of internal worms
- Effective against resistant worm populations
- Suitable for use in sheep from 6 weeks of age and over 10 kg
- Dose rate: 1 mL per 10 kg bodyweight
- 14-day meat withholding period
- 21-day Export Slaughter Interval (ESI)
- Do not re-treat within 42 days

Zolvix Plus can be a useful option as part of a strategic worm-control program, particularly where drench resistance is a concern.
As with all drenches, correct use and rotating drench groups as part of a planned worm-control program are important to help maintain their effectiveness.

🌾 Secure Your Oats for Next Season — Get your Orders in Early

As we prepare for the upcoming season, we encourage all customers to place their oats orders early to ensure stock is secured and available when you need it. Early ordering not only guarantees supply but also helps us plan ahead and maintain reliable stock levels across our most popular varieties

Stock that will be available through our store include:

- **CSG - NILE** a specific variety of dual-purpose oats, known for its suitability as both a winter forage crop for grazing and a grain for hay or feed.
- **CSG - BLACKBUTT** is an oat cultivar commonly used for dual-purpose forage and grain production, especially in New South Wales.
- **CSG - YARRAN** is an mid-late season oat variety that is suitable for grazing, hay, and grain production

- **ALFAGEN - OVERLAND** a high-yielding forage oat with rapid establishment, excellent tillering and strong late-season growth. Suitable for grazing, hay and silage.

Demand for these lines is already increasing, and early orders are the best way to avoid shortages or delays as we move closer to the new season If you'd like to discuss your requirements or lock in your preferred varieties, please get in touch with our team. We're here to help you stay ahead and well-prepared fora successful season. 🌱

RAPID PLAS TROUGHS

The reason why you should choose Rapid Plas products, is because of the high importance placed on product reliability, quality, style and looks, and a brand you can be proud of. Rapid Plas don't believe in cutting costs to sell cheaper if the customer will lose out with a faulty product.

RapidPlas Water Troughs are expertly designed for durability and portability, crafted from high-quality food-grade poly. These robust troughs withstand the elements while ensuring your livestock have consistent access to fresh water. Engineered to resist wear and tear, these troughs are tough, lightweight and easy to locate, making them ideal for any livestock and designed for long-lasting performance in harsh Australian conditions.

Contact us to see if we have what you need in stock. If not, we can order it in for you!

PRO TUB TROUGHS

- Linchpin secures float cover to prevent damage
- Float enclosure moulded as part of the trough
- Raised float allows trough to fill completely
- All pipework protected by trough surround
- 2" drain bung for easy cleaning
- Avalible in 3 sizes

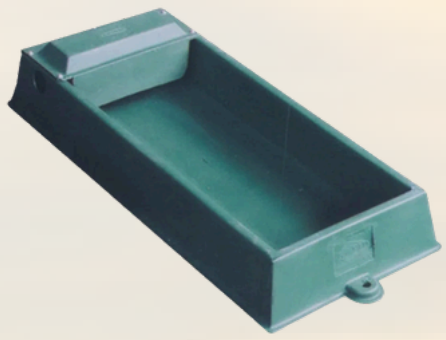

LONGLINE WATER TROUGHS

- Trough height 360mm
- Smooth interior with a 2" drain bung for easy cleaning.
- Peg down points at each end
- Water troughs come complete with a float and float cover which gives the float full protection from stock damage
- Avalible in 4 sizes

M SERIES WATER TROUGH

- Strong all-poly construction suitable for corrosive environments
- Light weight for ease of handling and relocation
- 4 sizes to choose from
- Covered float prevents stock damage
- Peg down points to prevent livestock pushing trough around
- Avalible in 4 sizes

ULTRA LONGLINE WATER TROUGHS

- One piece trough with fully protected 1" float system
- 2" Drain bung at either end
- Raised cover allows trough to fill to the brim
- All poly construction
- Avalible in 2 Sizes
