Castrol Oil

Transmax Agri MP Plus 20W-40
Super Universal Tractor Oil

Castrol Transmax Agri MP Plus 20W-40 is a quality multi-purpose oil suitable for use in a wide range of applications on the farm. It has been developed specifically to deliver performance and protection for engines, transmissions, wet brakes, hydraulics and front axles

Transmax Agri AS Trans Plus 20W-30

Universal, wet brake transmission/ hydraulic fluid

Castrol Transmax Agri AS Trans Plus 20W-30 is a universal, wet brake transmission/ hydraulic fluid designed to satisfy the various requirements of most tractor and farm machinery manufacturers. The AS (anti-squawk) characteristics of the formulation help to minimise the effect of wet brake chatter.

Castrol Magnatec 10W-40

Instant protection from the moment you turn the key

Up to 75% of engine wear happens while your engine warms up. When the engine stops, oil drains off critical engine parts, however Castrol MAGNATEC's doesn't. It clings to the engine like a magnet, providing an extra layer of protection.

Oats 2026

Sourced from the rich pastures of the Lachlan Valley, CSG provide a proven range of grazing and grain-only cereal and oil seeds for sowing.

Town and Country Rural Supplies have been working along side CSG for many years and can assure our customers that the seed you're buying is **GERMINATION & PURITY TESTED**.

Below is a short description of three popular oat seeds we currently stock in store:

Nile Oats

A medium height, late maturity variety producing good winter grazing in tableland districts. Grain recovery yields depend heavily on good, late-spring finishing conditions.

Blackbutt Oats

A dual purpose oat with early sowing and late maturing providing extended grazing with excellent grain recovery. Good resistance to frost damage after grazing. Medium grain size and test weight. Good for hay production.

Yarran Oats

A dual purpose oat with medium height and late maturing. Large grain size with high test weight. Yarran has a good protein percentage and low husk lignin content for digestibility. Good for Hay production.

New Season Seed

BROMAR SHEEP LICKFEEDER

The original 3-way restriction system since 1994

The Bromar Sheep Lickfeeder has a unique design and a superior licking action.

One of the key components of the Lickfeeder is the plastic inserts consisting of 11 holes on either side of the feeder. Sheep lick the grain out of these holes, remembering that the grain must be licked upwards to use the saliva on their tongues to get it out.

The feed area is easily adjusted by moving the metal covers above the plastic inserts in or out to either open up or close down the feed area.

KEN-ZON

Ken-Zon brush control herbicide is a co-formulation of Picloram and Triclopyr herbicides ideal for the control of tough woody and noxious weeds.

The Ken-Zon formulation contains specific emulsifiers to ensure even coverage and product stability.

BENEFITS

- Controls many hard to kill woody/brush weeds
- Can be used in various methods of application including, High volume spraying using Hand Gun or Knapsack, Aerial application, CDA, Boom spray, Blanket wipers.
- Contains specific emulsifiers to ensure coverage and product stability

FOR CONTROL OF WEEDS SUCH AS:

- ✓ Blackberry
- ✓ St John's Wort
- ✓ Lantana
- ✓ Rubber Vine

BEST USE TIPS

- Ensure plant back periods are adhered to
- Always use mixing partner where recommended
- Always use specific adjuvants where directed for best results
- Be aware of your surrounding areas.
- KEN-ZON is susceptible to physical and volatile spray drift into susceptible crops, plants, pastures, waterways and native vegetation

WHY CHOOSE CYDECTIN POUR-ON FOR CATTLE & RED DEER?

A second generation macrocyclic lactone endectocide for the treatment and control of moxidectin sensitive internal and external parasites of cattle and for the treatment and control of lungworm and gastrointestinal roundworms of red deer.

- **Contains moxidectin**

- CYDECTIN POUR-ON FOR CATTLE & RED DEER delivers the trusted power of moxidectin, the most trusted, potent and persistent “mectin, in a convenient pour-on formulation

- **Broad spectrum parasite control**

- CYDECTIN POUR-ON FOR CATTLE & RED DEER is highly effective against all major parasites that are susceptible to a ML drench including Ostertagia, lungworm, barber's pole worm, Nodule Worm, stomach hair worm, Hookworm, adult thin necked intestinal worm and Cooperia.

- **Persistent activity**

- Persistent activity can be used to clean up contaminated pastures and keep your cattle cleaner for longer – both of which lead to greater productivity.

CETRIGEN® ANTIBACTERIAL WOUND SPRAY FOR ANIMALS

An antibacterial topical application for use on open wounds in cattle, sheep, pigs, horses, poultry and all other animals.

WHY CHOOSE CETRIGEN?

- Contains an antiseptic to protect wounds from infection
- CETRIGEN contains cetrimide, a well known antiseptic with antibacterial properties that inhibits the growth of bacteria to prevent re-infection.
- Contains a powerful insect repellent. Deet contained in CETRIGEN is regarded as one of the most effective insect repelling compounds available. DEET acts by creating a shield of repellent vapour as it evaporates.
- CETRIGEN's broad species application means that it is a versatile treatment option for all animals. CETRIGEN can be safely used on all domestic pets and farm animals.
- CETRIGEN has a purple dye included in the formulation so that the area treated can be easily identified to ensure full coverage. The dye will remain intact on the wound under most conditions so that treated areas can be quickly identified each day.
- CETRIGEN is available in a 100 g aerosol and a 500 mL trigger spray.
