

Congratulations!

Congratulations to Vicki on receiving an OAM on the Queens Birthday.

Vicki was very appreciative from all the messages, cards and wishes from everyone.

TRUNKY TO BATHURST

A message from Paul Toole

Buses from Trunkey to Bathurst.

You can now get from Trunkey Creek to Bathurst and back every Wednesday.

It's easy and affordable. Simply book your seat, sit back, relax and let us do the driving.

*Return services every Wednesday

*Discounted fares for children and concession card holders

*Space for shopping and prams

*Connect at Bathurst with NSW TrainLink services to Sydney and Dubbo

Timetable can be found on the link below:

<https://transportnsw.info/regional/regional-coach-bus-trials>

How to book:

Book directly with Bathurst Buslines by calling 6331 2744.

WHO WE ARE

Founded in Australia by Hilary White in 1979, Elmstock specialises in the sale of premium quality teas, sourced from all the world's major tea growing countries and regions. Fruit and herbal infusions which are a growing part of our business are imported from leading producers in Europe. Elmstock Tea Company has a rich tradition of continuous involvement in the tea trade spanning five generations.

HISTORY

However, the family's ancestry and its participation in the agricultural pursuits of the island of Ceylon (Sri Lanka) precedes the tea industry of Ceylon and can be traced back to the early nineteenth century.

THE ELMSTOCK QUALITY GUARANTEE

Elmstock sources its tea from the finest tea gardens. Connoisseurs of tea will readily recognise its quality, fresh flavour and distinctive aroma. To make a good cup of tea actually requires a smaller amount of tea than cheaper varieties (worth remembering when comparing prices!). Elmstock teas are guaranteed to be distinctively 'fresher'.

Enjoy a cuppa on us!!

PURCHASE A TELFER RURAL DOG KENNEL BETWEEN
1ST JUNE 2020 – 31ST JULY 2020
TO GO INTO THE DRAW!

WIN SIX MONTHS OF
COBBER

Telfer Dog Kennels today

Our pipes, developed from recycled plastic, have been developed to be a tough, robust pipe suitable for a wide range of applications.

- ◆ Sizes: 315, 400, 450, and 630mm diameter
- ◆ All pipes are delivered in 6 m lengths
- ◆ Spigot and faucet joining system
- ◆ "O" ring seals available
- ◆ Tough and robust
- ◆ Department of Transport (VicRoads) approved

- ◆ Suitable for culverts, flood irrigation, drainage or pipe lines. RPM pipes can be used in most low pressure applications and have been used for many innovative and unique projects over the years.

ANIMAL PRODUCTION UPDATE

Lamb & Calf Marking Checklist

It's almost time to start thinking about marking your lambs and calves! Have you got everything you need? Make sure you are organised, call us today and get what you need!

- ◆ Vaccine—e.g. Glanvac 6S B12 or Ultravac 7in1
- ◆ Vaccination Guns—e.g. 1ml, 5ml
- ◆ Needles - e.g. 16G x 1/2 or 18G x 1/2
- ◆ Ear Tags—e.g. NLIS Tag, Management Tag, Flexitag, Flock Tag
- ◆ Tag Applicator— e.g. Flexitagger, Identiplier
- ◆ Marking Rings— eg. Pack of 500 or 2000, Jumbo rings
- ◆ Fly Treatment—e.g. Extinosad, Maverick
- ◆ Drench for Mature Stock—e.g. Cydectin, Avomec Plus

It is important for producers to follow best practice principles, which include:

- ◆ Reduce stress before, during and after the procedure by: good preparation, using well-maintained equipment, using low-stress stock handling, reducing separation time, and avoid immediately moving stock over large distances.
- ◆ Minimise risk of dehydration by providing access to water, and allowing animals to rest.
- ◆ Minimise risk of infection by using strict hygiene methods and adequate protection.

AKULA

Concentrate for Fly and Lice

Active Content & Action

Ivermectin 16g/L

Use

For the treatment of, and protection against, blowfly strike on sheep for up to 12 weeks under low to moderate fly pressure and treatment of biting lice by jetting in long woolled sheep.

Period of protection

Up to 12 weeks for fly's

Withholding periods

Meat— DO NOT USE less than 7 days before slaughter for human consumption.

Milk— DO NOT USE in lactating ewes or within 28 days of lambing where milk may be used or processed for human consumption.

Wool— DO NOT USE less than 6 weeks before shearing or fibre collection.

Trade advice

ESI 7 Days

SF00-SF06-0002

EUREKA GOLD®

Spray-On Off-Shears Sheep Lice Treatment

Active Content & Action

Diazinon 93.3 g/L. Diazinon is a nonsystemic organophosphate (OP) insecticide which functions as an acetylcholinesterase (AChE) inhibitor with no known resistance identified in Australian sheep lice.

Indications

EUREKA GOLD® is an off-shears spray-on backline lice treatment is indicated for the control of organophosphate (OP) susceptible and synthetic pyrethroid (SP) resistant strains of the sheep body louse (*Bovicola ovis*)

Dosage and Administration

Mixing
EUREKA GOLD® is supplied as a concentrate which must be diluted with clean water prior to use. Mix 1 part of EUREKA GOLD® to 6 parts of water. The diluted product must be used within 3 days of mixing. A scorable yellow dye is incorporated into the product to identify treated sheep.

Dose Rate

Once diluted, EUREKA GOLD® is applied at the rate of 3 mL/kg bodyweight. Determine the correct dose by weighing the heavier animals in the mob and dose according to the heaviest bodyweight within each animal class.

Performance in case of rain

In field trials with EUREKA GOLD®, moderate rainfall (up to 37 mm within 24 hours of treatment) on the day of treatment did not reduce the efficacy of EUREKA GOLD®. Zagro is confident that the efficacy of EUREKA GOLD® will not be compromised by moderate rainfall after treatment.

Note: EUREKA GOLD® should not be applied to wet sheep.

Precautions if rams are sedated before shearing

For OHS reasons, it is common practise to sedate larger rams prior to shearing with Acepromazine products. Acepromazine is known to potentiate the toxicity of Organophosphates such as diazinon and could cause implications if EUREKA GOLD® (containing diazinon) is used on the same day of sedation.

Acepromazine sedated rams should be allowed to fully recover from sedation prior to application of EUREKA GOLD®. Ideally, rams should be rested overnight and brought back into the yard the day after shearing (within 24 hours) for treatment with EUREKA GOLD®.

Note: Zagro Australia has never received an adverse event report when EUREKA GOLD® has been applied immediately after shearing rams that were sedated with Acepromazine.
