## 152nd ROYAL BATHURST SHOW

The Royal Bathurst Show has long been regarded as the best west of Sydney and has boasted an average annual attendance in excess of 20,000 people. Town and Country Rural Supplies will be at the show again this year with displays from 15 of our suppliers. Drop in for a cuppa, 30th April to 2nd May. Get your tickets now - <http://www.bathurstshow.com.au/>

**SEE YOU AT THE SHOW!**

**Red River**

**Boehringer Ingelheim**

**SUPAGAS**  
YES WE CAN!

If you are a young woman aged 18 - 24 and want to become an ambassador for the Agricultural Show movement, are already involved in your local community or the agricultural industry, you could be a Reliance Bank Royal Bathurst Showgirl. Entry forms can be picked up at 2BS, the show office or by calling Town & Country on 6332 4044.

You will meet like minded young ladies, get involved in the community and receive a three day VIP pass to our great Show and great prizes. Entries close 9th April . Call Vicki on: 0448 828 369

## Coming Soon - The New Gold Standard in Sheep Vaccines!

The **NEW GOLD STANDARD** of Sheep Vaccines

**GlanEry® 7in1 B12**

GlanEry 7in1 B12 is an advanced formulation which combines the proven protection of Glanvac® 6 B12 and Eryvac® in the one convenient vaccine. Developed and Manufactured In Australia.

- ✓ Stops **Lame Lambs**
- ✓ Protects your **Wool Cut**
- ✓ Protects **Meat Quality**
- ✓ More **Lambs to Sell**
- ✓ **Easy & Convenient**

- ERYSIPELAS ARTHRITIS**
- +
- CHEESY GLAND (CLA)**
- +
- 5 CLOSTRIDIAL DISEASES**
- &
- BOOSTED WITH VITAMIN B12**

**ALL IN A 1ML DOSE**

The new product combines the proven protection of Glanvac® 6 B12 and Eryvac® in the one convenient vaccine. GlanEry 7in1 B12 will be available in a 250ml pack size from the 3rd May 2021.

## Local Land Service Rates Waived for 2021

The NSW Government has once again waived Local Land Services (LLS) rates for 2021, as farmers across the region work towards drought recovery. The region's farmers have been doing it tough over the past three years, and while conditions have improved significantly, drought recovery does not happen overnight. LLS ratepayers can expect their notices to arrive in the coming weeks, informing them that their rates have been waived for 2021.

To find out more about available assistance measures and eligibility criteria, visit [www.dpi.nsw.gov.au/climate-and-emergencies/droughthub](http://www.dpi.nsw.gov.au/climate-and-emergencies/droughthub) or phone the NSW Rural Assistance Authority on 1800 678 593.

## Bloat

Bloat is the accumulation of excess gas in the rumen. It can develop in less than one hour after introduction to a high-risk paddock, but more often it develops after one day.

The gas can either be:

- free – accumulating because the rumen is flaccid and not performing its usual eructation function
- frothy – due to chemicals increasing the surface tension of the rumen liquid.

### Conditions when bloat is likely to occur:

- Wilted green forage and some plants can contain prussic acid which leads to rumen paralysis and free gas bloat.
- Lush rapidly growing legume pastures can cause frothy bloat. More likely to occur with legume pasture in rapidly growing vegetative stage and in highly digestible pasture with a low dry matter percentage. The highest risk pasture is lucerne, followed by white clover, then subterranean clover.
- Intensive ration feeding with a low fibre component (where greater than 80% of the ration is grain). This type of ration feeding occurs mainly in feedlots or during drought feeding.

### Identification and diagnosis:

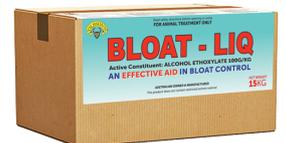

- sudden death
- distension in the left upper flank if still alive or if others in mob are showing mild signs
- the condition is painful and affected cattle will be agitated and may vocalise or rub their sides against objects such as tree stumps.

### Bloat Drench - by Vicchem

- Very effective and reliable method for preventing bloat
- Recommended for use as an oral drench but can also be used in bail feeding with molasses or in drinking troughs and drum rollers
- Remains effective for about 12 hours, therefore dosing may be required twice-daily

**Olsson's Bloat-Liq** is a molasses-based, anti foaming block (10% Alcohol Ethoxylate Teric 12A 23) designed to relieve the symptoms of this annual killer. Bloat-Liq is rain resistant, easy to use and is one of the best value bloat products on the market.

## Dynamax Capsules - Boehringer Ingelheim

For the treatment and 100 day control of sensitive strains of **gastrointestinal roundworms and lungworms in adult sheep**. Provides a selenium and cobalt supplement for sheep raised in selenium and/or cobalt deficient areas. Dynamax® can significantly delay the development of resistance.

- Combined power of two actives – abamectin and albendazole
- Trace mineral benefits of selenium and cobalt
- The capsule also prevents pasture contamination with nematode eggs for at least 100 day
