Prepping for Fodder Crops

Some key points to consider when planning to grow oats to provide high quality winter feed.

Paddock selection and preparation

- Select soil types with sufficient water holding capacity and nutrition.
- Avoid planting on steep slopes where there is an increased risk of losing valuable nutrients
- Select paddocks with low weed pressure.
- Select paddocks with adequate stock water and are of suitable size for effective grazing management.

Seed

- Different oat varieties have been bred for their forage characteristics, grain or for dual purpose use. Select an oat variety suited to your growing conditions and purpose.
- Ensure seed has been graded. Graded seed has weed contaminants removed from the sample. Not only does this eliminate planting weed seed, it also eliminates planting weed seeds that are genetically more likely to be resistant to in-crop herbicides. Graded seed also has debris and dust removed from the sample which could otherwise block planter hoses and metering units, this can result in bare areas within the crop where weeds can thrive from the lack of competition

The following sowing times provide a guide only.

Tablelands

- Feb - Apr, winter/spring grazing dual purpose or grazing only.
- A sowing depth of 5cm is ideal but oats can be sown as deep as 7cm if moisture seeking

The following seeding rates provide a guide only to maximise production

Tablelands

- 80 - 120 kg/ha, grazing and grain
- 60 - 80 kg/ha, grain only

Soil Nutrition

- Apply fertiliser to address the nutrients that are most limiting production. The most common limiting nutrients are Phosphorus (P), Sulfur (S) and Nitrogen (N).
- Higher nutrition is required for dual purpose crops.

COWRA Seed

Sourced from the rich pastures of the Lachlan Valley, CSG provide a proven range of grazing and grain-only cereal and oil seeds for sowing.

Town and Country Rural Supplies have been working along side CSG for many years and can assure our customers that the seed your buying is **GERMINATION & PURITY TESTED.**

Below is a short description of three popular oat seeds we currently stock in store:

Nile Oats

A medium height, late maturity variety producing good winter grazing in tableland districts. Grain recovery yields depend heavily on good, late-spring finishing conditions.

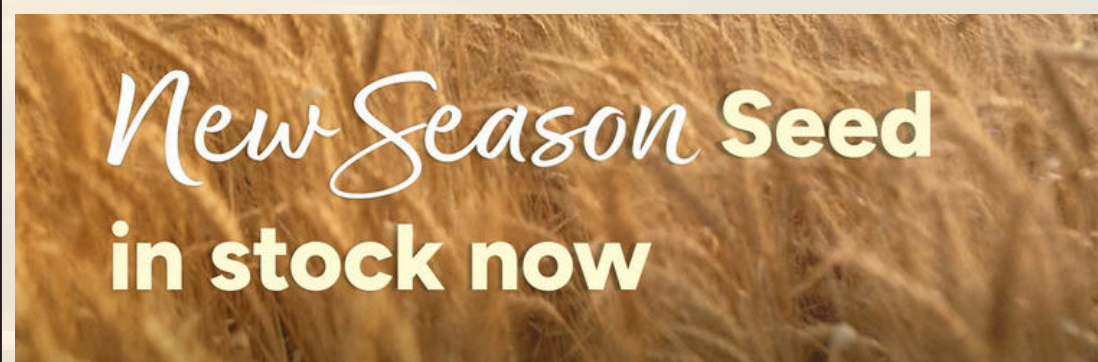

Blackbutt Oats

A dual purpose oat with early sowing and late maturing providing extended grazing with excellent grain recovery. Good resistance to frost damage after grazing. Medium grain size and test weight. Good for hay production.

Yarran Oats

A dual purpose oat with medium height and early maturing. Large grain size with high test weight. Yarran has a good protein percentage and low husk lignin content for digestibility. Good for Hay production.

Get in fast as we only have limited stock available in 25kg Bags!

COBBER PROMO 2025

Right now, when you buy any Cobber product, you'll go into the running to win a EUFY Pet Dog Camera & Treat Dispenser valued at over \$500. Plus heaps of other prizes to be won.

Buy any bag of **COBBER** and enter online to **WIN**

Hundreds of **instant win** prizes up for grabs!

Promo starts 3rd February and runs until 2nd May – or until all prizes are claimed.

ENTER NOW!

Inner thoughts. Inner goodness.

POV: Me hoping my human buys some Cobber so I can win some new toys

Inner thoughts. Inner goodness.

IMPORTANT NOTICE – WSD DIAZINON DISCONTINUED

- WSD DIAZINON 5L
- WSD DIAZINON 20L

Following the announcement by the APVMA on the 10th of September 2024 under section 34AC of decision on reconsideration under the Agriculture and Veterinary chemical code: diazinon reconsideration. The final decision has resulted in the cancellation of most Diazinon product registrations and associated labels.

Due to this announcement, we regret to inform you that we are no longer able to accept any further orders for the above-mentioned products

RYDAL 102ND ANNUAL SHOW 2025

Friday 7th February 2025
(pavilion entries & judging only)

Saturday 8th February 2025
Gates open 6am

What to look forward to:

- The cooking section is a stand out with so many different ways to display your culinary talents!
- The animal sections, if you have cattle, sheep, horses or dogs that you would like to show off and have any queries, please get in contact with the head steward of the section!
- Art, needlework, schoolwork, photography and craft are all wonderful ways to show off your talents no matter how old you are!
- Many gardens have been blooming with beautiful flowers so why not enter in our horticulture section!
- If you have some impressive fleeces then you should enter them in our Wool section!
- If you've grown some fruit or vegetables why not show them off in the Fruit and Vegetable section!
- Young Woman Ambassador Competition and Local Junior Ambassador Competition - see program for more details.
