HAPPY NEW YEAR 2026

Thankyou for the continued support
throughout the year we hope you
had a very Merry Christmas and a
Happy New Year!

Virbac - Websters 6 in 1 SE

WHAT IS WEBSTERS[®] 6 IN 1 SE VACCINE?

- Prevents five clostridial diseases (pulpy kidney, tetanus, black disease, blackleg, malignant oedema)
- Prevents cheesy gland
- Contains selenium for the prevention of white muscle disease and unthriftiness in lambs
- Suitable for use in lambs
- Only for use in selenium deficient areas

DOSAGE & DIRECTIONS FOR USE

1 mL dose by subcutaneous injection (high on the neck behind the ear).

Lambs - Dose at marking followed by a second dose 4 to 6 weeks later (e.g. weaning). Annual booster dose will maintain a high level of immunity.

Ewes (fully vaccinated as lambs) - Annual booster dose. Administer 2 to 3 weeks prior to lambing if possible.

STORAGE

Store between 2°C and 8°C (Refrigerate. DO NOT FREEZE). Protect from light.

WITHHOLDING PERIODS/ESI

Meat/Milk: Nil

ESI: Not required

PACK SIZES

Liquid: 200 mL

Extinosad Lice, Fly and Maggots Extinosad[™]

Eliminator contains spinosad and is an effective treatment to clean up lice, blowflies and maggots in sheep.

Key Product Benefits:

- Controls lice in short wool or long wool
- Treats existing blowfly strike and prevents blowfly strike
- Zero (0) day wool and meat withholding periods

1. Zero (0) day ESI when used for long wool jetting Allowable input on Australian Certified Organic properties

Extinosad[™] Aerosol is a ready-to-use product for the treatment and prevention of blowfly strike in mulesing, marking and other wounds of sheep including OP-resistant strains. The aerosol formulation treats 20 average-sized wounds.

Key Product Benefits:

- Convenient treatment for active blowfly strike
- Ready to use
- Nil withholding periods for meat and wool

Hay Rack Feeder

Engineered for strength and efficiency, the Bainbridge Hay Rack Feeder is ideal for use in paddocks or stables.

Its UV-stabilised construction and secure lid protect feed from wind and moisture, ensuring it stays clean and dry

A wide-mouth opening easily fits a hay biscuit, while the integrated return lip and generous catchment area below the rack help minimise feed loss and mess

Reinforced with heavy-duty galvanised brackets for long-term durability

Equine D Feeder

Engineered for durability and control, the Bainbridge D Feeder is built to perform in demanding outdoor environments.

Features hooks to allow hanging over rails and fences. Its raised return lip helps prevent feed from being blown or dragged out, keeping feeding areas cleaner and reducing waste.

Constructed from non-toxic, UV-stabilised, food-safe materials, it resists rust, cracking, and harsh weather conditions

Heavy-duty galvanised fence brackets ensure secure mounting and long-term reliability

A tough, practical solution for paddocks, yards, or stables

SILVAN SELECTA POWER FIREFIGHTING PUMP

The Silvan selecta power water transfer pumps handle high volume water pumping and are ideal when portability is needed or power supply is scarce. This pump is made for firefighting and other high volume hosing and it features a carry/mounting frame for mobility and added protection.

Pump Size (L/MIN): 250

Max Pressure: 7 Bar/100 psi

Zinjet Jetting Fluid – Effective Flystrike & Lice Control

Dalgety's Zinjet Jetting Fluid is a concentrated jetting treatment for sheep, designed to treat and protect against blowfly strike and to control biting lice in long-wool sheep when applied by jetting.

Active ingredient: Ivermectin 16 g/L, proven for reliable maggot and lice control.

Protection: Helps protect sheep from blowfly strike for up to 12 weeks under low to moderate fly pressure.

Pack size: 5 L concentrate suitable for dilution and jetting.

Targets: Flies, lice and maggots on long-wool sheep

GREENLINE IMPERIAL RURAL PIPE

Designed specifically for rural water and irrigation applications, the 2" Iplex Greenline Imperial PE100 Poly Pipe delivers reliable performance where durability matters most. Manufactured from high-quality PE100 polyethylene, this pipe comes in a black finish with a green stripe for easy identification of rural water lines.

Supplied in a convenient 100 m coil, it supports multiple jointing methods including electrofusion, compression, butt-weld and mechanical fittings. Rated to 800 kPa at 20 °C and suitable for up to 2 years of unprotected UV exposure, it's a tough, flexible solution built for demanding rural environments.

Food Grade IBC Tanks – Versatile, Reliable Storage

Our food grade IBC tanks are a practical, heavy-duty solution for a wide range of on-farm and commercial applications. Designed for safe storage and transport, they're ideal for water for irrigation or livestock, firefighting reserves, liquid or dry feed, and fertilizers or pesticides.

Built tough and easy to handle, these tanks offer excellent capacity, durability, and flexibility, helping you streamline storage while keeping contents secure and accessible. Whether you need a dependable water source or a multi-purpose storage option, our food grade IBC tanks deliver reliable performance where it counts.
