SPARTAN

Spray On Sheep Blowfly
Protection

Active Content & Action

Cyromazine 60 g/L. Cyromazine is part of the triazine group of chemicals. Cyromazine disrupts nerve transmission in the target parasite.

Use

A ready to use solution to protect sheep against fly strike by *Lucilia Cuprina*.

Indications

Nil

Period of protection

When applied as directed will protect long wool sheep against fly strike for 11 weeks.

Dosage and Administration External Use Only.

Do not dilute. Do not mix with any other product.

Except for small lambs under 15Kg, the dose volume is determined by the number of months shearing. Apply Spartan according to the diagrams and tables in the Directions for Use.

Spartan Spray may be applied to all breeds of sheep, providing protection against flystrike. Spartan Spray is applied as a low-volume treatment onto or near areas where protection is required. When applying, the nozzle of the applicator gun should be approximately 25cm above the fleece, to achieve a 15cm wide band at each pass.

Months Since Shearing	Total Volume/ Sheep (ML)	Volume Per Treatment Band (ML)	No. of Bands	Sheep Treated Per 1L	Critical Comments	
For the prevention of body strike						
Up to 6	34	17	2	29	<ol style="list-style-type: none"> 1. Use a ZAGRO AUSTRALIA recommended Spray-On applicator gun. 2. Ensure the applicator gun is clean. 3. Calibrate applicator gun using an accurate volume measure. 4. Ensure all areas to be protected are treated. 5. When preventing body strike ensure bands overlap along the midline. 6. This product is not ideal for treating existing strikes. 7. Heavy rain following the application of this product could diminish the period of protection. 8. SPARTAN SPRAY-ON is coloured for band identification. This scourable dye will disappear shortly after treatment.
