Happy New Year 2025

FROM VICKI AND THE TEAM AT TOWN & COUNTRY
RURAL SUPPLIES, WE HOPE YOU HAD A WONDERFUL
CHRISTMAS AND WISH YOU A HAPPY NEW YEAR.

Fight Fly Strike this season

STRIKER SPRAY-ON provides season long protection to sheep against body, breech and poll strike and may be used either off-shears (within 24 hours of shearing) or in sheep with any length wool.

AKULA, is a jetting fluid that uses Ivermectin concentrate for the treatment of, and protection against, blowfly strike on sheep for up to 12 weeks under low to moderate fly pressure and treatment of biting lice by jetting in long woolled sheep.

CLiK SPRAY ON is indicated for the protection of sheep, either off-shears or with any length wool, against fly strike caused by dicyclanil-susceptible strains of blowflies (*Lucilia cuprina*) for 18 to 24 weeks. CLiK is also indicated for the protection of mulesing and marking wounds on sheep against fly strike caused by dicyclanil-susceptible strains of blowflies during the wound healing process.

Extinosad Lice, Fly and Maggots

Extinosad™ Eliminator contains spinosad and is an effective treatment to clean up lice, blowflies and maggots in sheep.

Key Product Benefits:

- Controls lice in short wool or long wool
- Treats existing blowfly strike and prevents blowfly strike
- Zero (0) day wool and meat withholding periods
- Zero (0) day ESI when used for long wool jetting
- Allowable input on Australian Certified Organic properties

Extinosad™ Aerosol is a ready-to-use product for the treatment and prevention of blowfly strike in mulesing, marking and other wounds of sheep including OP-resistant strains. The aerosol formulation treats 20 average-sized wounds.

Key Product Benefits:

- Convenient treatment for active blowfly strike
- Ready to use
- Nil withholding periods for meat and wool

Triguard®

Triple Combination Drench

For the control and treatment of internal parasites of sheep. Also provides a selenium and cobalt supplement for sheep raised in selenium and/or cobalt deficient areas.

Benefits

- Combined power of 3 actives¹
- No on-farm mixing
- Kills worms resistant to white, clear, or ML drenches*
- Can significantly delay the development of resistance
- Stable formulation
- High potency with broad-spectrum activity*
- Proven in the field

Seed Requirements

As it comes to the new year we recommend our customers enquire about their autumn and winter, seed requirements, this gives us plenty of time to order in and have your stock arrive in time.

Our trusted seed suppliers include S&W Seed (Alphagen Seed), DLF Seed and Cowra Seed and Grain.

Soil Testing

Soil analysis enables you to:

Predict: check the soil's fertility or nutrient status, and predict nutrient requirements

Monitor: assess the suitability of current management practices over time, adjusting existing fertiliser programs, if necessary, to ensure optimum yields are achieved.

Diagnose: determine the reason for poor growth, or to check on accumulation of mineral elements toxic to plants

The end result is a fertiliser recommendation tailored to the individual requirements of your production system.
